" Right Choice For Your Packaging Needs "

## TEAM OVERVIEW

At our company, we create customized products tailored to the unique needs of our customers, prioritizing quality, effectiveness, and eco-friendliness. We are dedicated to producing packing materials that emphasize sustainability and durability, making them highly suitable for the specific requirements of our clients' products.

Our specialized R&D team brings innovative ideas to product packaging, continuously observing customer needs to ensure top-notch quality and satisfaction.

Additionally, our design team excels in crafting custom designs and artworks, streamlining the process to optimize customer requirements and enhance efficiency.

### Products:

- Food packaging
- Pharmaceuticals products packaging
- Industrial packaging
- Textile packaging
- Baby products packaging
- Cosmetic packaging
- Electrical products packaging
- Home Appliances packaging

When it comes to printing and packing materials, we exclusively recommend high-quality, sustainable, and durable options such as Art Paper Board, Duplex Board, Cyber XL Board, and Natural Kraft Boards. Our materials are available in high GSM, with a refined finish that includes both matte and glossy lamination.

We are committed to enhancing the presentation of our customers' product packaging through our high-performance infrastructure, advanced machinery, and skilled workforce.

#### **DUPLEX BOARD**

Duplex board is a type of paperboard that has a double layer of fibers, typically used for packaging applications. One side of the board is usually smooth and coated, which enhances its printing properties, while the other side is uncoated and coated. (200 gsm to 450 gsm)

#### **CYBER XL BOARD**

A Cyber XL board refers to a specific type of high-quality duplex board. It is known for its strength, stiffness, and smooth surface, making it suitable for premium packaging boxes.

(300 gsm to 500 gsm)

### **NATURAL KRAFT**

Natural Kraft Board is made from unbleached kraft paper, known for its strength and durability.

The brown, earthy look of natural kraft gives a rustic, organic feel, which is appealing for branding and can enhance product presentation.

We can make it in virgin kraft, Semi-virgin kraft and also in 3 ply to 7 ply. (100 gsm to 200 gsm)

#### **LAMINATION**

#### Gloss Lamination:

Gloss lamination consists of a smooth plastic that reflects light and creates a shiny layer.
It can feel smooth to the touch.

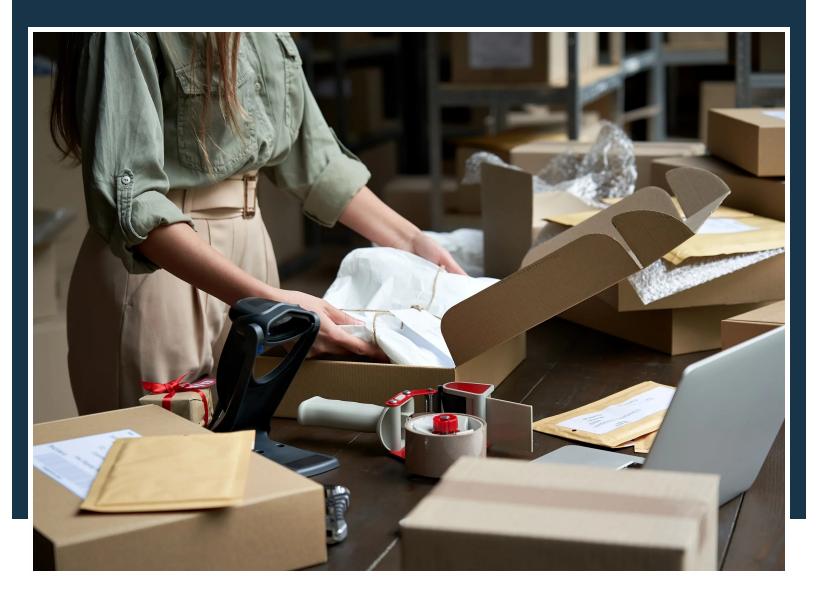

#### **Matt Lamination:**

Matt lamination adds a smooth, clear finish to products without adding lots of shine.

It also adds a silky texture.

#### **EFFECTS**

Spot Uv, Emboss and Foil.

# <u>Infrastructures</u>

- Semi-Automatic Die Cutting Machine.
- High Speed Corrugating Machine.
- Sheet Pasting Machine.
- Stitching Machine.
- Power Cutting Machine.
- Lamination Machine.
- Man Power 15 to 30.
